EDUCATION

University of North Carolina at Chapel Hill

May 2025

Bachelor of Science in Biology, Second Major in Geography

- GPA: 3.5
- Carolina Scientific Design Editor and Illustrator
- USFQ Ecology Student, May – June 2023 (Quito, Ecuador)

FIELD & LAB RESEARCH EXPERIENCE

Research Assistant | Field Mapping & Community-Based Projects

September 2023 – May 2025

Department of Geography, UNC Chapel Hill | Advisor: Javier Arce-Nazario

- Princeville Cemetery Mapping
 - Collected field data at the historic Wilson Cemetery using differential GPS and Survey123
 - Captured aerial data and collected LiDAR data to build 3D representations of headstones
 - Developed an interactive web map as a public resource for residents of Princeville, NC to easily view information about their late relatives
- Tarboro Community Garden
 - Cataloged plant species and researched their cultivation and ecological details
 - Designed a garden map using Adobe Illustrator
 - Created botanical illustrations to visually display native and edible plants
- Ecuadorian Map Vectorization Project
 - Vectorized hand-drawn community maps from the Ecuadorian Amazon, balancing cultural authenticity with modern cartographic design

Research Assistant | Field DNA Extraction & Soil Microbial Ecology

May 2023– June 2023

Universidad San Francisco de Quito | San Cristóbal, Ecuador | Professor: Senay Yitbarek

- Conducted field research comparing soil microbial communities across varying elevations and locations
- Collected soil samples in the field and recorded precise site coordinates
- Performed DNA extractions on soil samples for downstream microbial analysis
- Measured optical density of extracted DNA to verify sample quality and ensure accuracy

ADDITIONAL EXPERIENCE

GIS Intern

October 2025 – Present

Raftelis Financial Consultants, Inc. | Durham, NC | Supervisor: Katie Cromwell

- Performed GIS data development and analysis in ArcGIS Pro to support stormwater infrastructure projects
- Interpreted aerial imagery to identify and delineate impervious surfaces across designated project areas
- Maintain accuracy, completeness, and consistency of spatial datasets in accordance with project standards
- Supported implementation of a new Zoom Phone system, contact center platform, and web portal for a utility company client, coordinating a rollout to over 200 users

SKILLS

Field & Lab: GPS data collection, drone & LiDAR data collection, DNA extraction, soil sampling, Survey123, open water scuba certified

Technical: ArcGIS Pro, ArcGIS Online, QGIS, R, JavaScript, HTML, CSS, Adobe Illustrator, Microsoft Office

Languages: Fluent English, Beginner Spanish

AWARDS AND HONORS

- John W. Florin Award – Best Research Paper on the United States (2025)
- Dean's List – Fall 2021, Spring 2024, Fall 2024, Spring 2025
